Consonants

	unvoiced unaspirate	unvoiced aspirate	voiced unaspirate	voiced aspirate	nasala
Gutturals (or Velars)	k	kh	g	gh	ṅ
Palatals	c	ch	j	jh	ñ
Retroflexes (or Cerebrals)	ṭ	ṭh	ḍ	ḍh	ṇ
Dentals	t	th	d	dh	n
Labials	p	ph	b	bh	m

Semi-vowels y r l ḷ ḷh v

Sibilant s

Aspirate h

The *anusvāra* (the pure nasal *ṃ*) does not change before *y*, *r*, *l*, *v*, *s*, and *h*; and in that position it comes before all other consonants in the alphabetical order. For example, *saṃvara* and *saṃsaya* come before *saka*.

Before other consonants, *ṃ* may change to the class nasal, i.e. that in the same line in the table above. For example, *-ṃk-* may be written *-ṅk-*, *-ṃc-* may be written *-ñc-*). Thus *saṃgha* is the same as *saṅgha*, *saṃcaya* as *sañcaya*, etc. Even when the *anusvāra* is written, its place in the alphabet is that of the equivalent class nasal.

Foreword

The first Pāli-English dictionary, published in two volumes in 1872 and 1875, was the work of Robert Caesar Childers. His main source was *Abhidhānappadīpikā*, a dictionary in Pāli, probably of the late 12th century, which was itself based on the Sanskrit *Amarakośa*. He was able to consult Singhalese bhikkhus, but had access to very few Pāli texts. Even so, his dictionary is an admirable work and a considerable achievement for its time.

As European knowledge of Pāli texts grew, Childers' dictionary became unsatisfactory, and one of the aims of Thomas William Rhys Davids, the founder of the Pāli Text Society, was to produce a Pāli-English dictionary better able to serve the needs of those wishing to read or indeed edit Pāli texts. In the early years of the last century he tried to find scholars throughout Europe to co-operate in producing such a dictionary, but he met various setbacks and disappointments, and after the First World War had ended most hopes of international co-operation, he at last decided that he himself would launch what he thought of as a provisional dictionary, with Dr. William Stede as co-editor, and using some material provided by other scholars. This invaluable dictionary was published from 1921-1925.

Meanwhile, in Copenhagen, Dines Andersen and Helmer Smith had begun to produce the Critical Pāli Dictionary, the first fascicle of which appeared in 1924. They had the benefit of the work of Carl Wilhelm Trenckner (1824 - 1891), who, while making transcripts of most of the Pāli manuscripts in the rich Copenhagen Collection, and of others from London, had made preparations for a dictionary, writing small paper-slips containing words and references, observations on grammar and syntax, and quotations illustrating secular and daily life. Andersen and Smith possessed a wide knowledge of Pāli combined with expertise in philology, in

grammar, in Sanskrit and in other Indo-Aryan languages, and they laid strong and solid foundations for the Critical Pāli Dictionary. It is a giant work, an exhaustive dictionary, and for any serious Pāli scholar, indispensable. Fascicles continue to be produced, but it will be many years before it is completed.

In the Foreword to the first fascicle of the Pāli Text Society's dictionary, Rhys Davids wrote:

> 'It has been decided ... to reserve the proceeds of the sale [of the first edition] for the eventual issue of a second edition which shall come nearer to our ideals of what a Pāli Dictionary should be.'

This was the task I began several years ago. Within a very short time I realised that so little could be left unaltered that I had to produce a completely new dictionary, not a revision of the existing one. Rhys Davids' dictionary is only one of my sources, although an important one. The dictionary does however remain essentially a dictionary of the texts published by the Pāli Text Society.

This dictionary has two main aims: first, to help its user read and understand the Pāli Canon and its commentaries; and second, to provide a picture of the language, syntax, and even grammar of these texts.

To achieve the first aim, I have tried to define all the words which appear in the texts in so far as that is possible given the fallibility of even the most recent technological aids and the limits of human capability. For the second, I have extensively used quotation to illustrate meaning, rather than providing mere references, and have given detailed information on declension and especially on parts of verbs. As a secondary aim was to produce a relatively concise dictionary, there are some things this dictionary is not. It is not an etymological dictionary, its primary reference being to Sanskrit. It is not a concordance, but quotes selectively. I have tried to show the range of texts in which a word appears, but the emphasis is on canonical texts, with less reference to commentaries. Not every compound is listed, only those where the members do not appear independently, or where the meaning might not be immediately apparent. Negative forms and many forms with *su-*, *du(r)-* or *ni(r)-* are given under the primary word.

The writing of this dictionary presented two main difficulties. The first is that it proved impossible to be sure of the meaning of some words, where etymology and context were not sufficient to produce certainty. There are, therefore, more queries remaining than one would like. The second difficulty concerns the texts themselves. It is likely that most users of this dictionary will also be using mainly the editions of the Pāli Text Society. The majority of these editions were made many years ago, sometimes from only one or a very few manuscripts, by editors who had little help to aid their decisions. The consequence is a considerable number of doubtful readings. I have therefore very often quoted from the Burmese, Singhalese and Thai editions. Sometimes it is possible to express a preference for one or the other reading, sometimes each reading could be justified, sometimes no reading is really convincing. I give these alternative readings so that the reader may consider and choose, and to point out the fallibility of all editions.

I have tried to give the quotations as they appear in the texts, but I have regularised some spellings: whatever the edition has, I always write final *anusvāra* (eg *~aṃ ca*, not *~añ ca*; *~aṃ yeva*, not *~aññeva*), and *vy-* (not *by-*).

It hardly needs to be said that I, as any writer of a dictionary, depend on the work of previous and present scholars, in particular of the writers of the Pāli Text Society's first Pāli-English Dictionary and of the continuing Critical Pāli Dictionary. Generally I make no acknowledgement to these scholars in the articles of the dictionary, but I do so now, for my debt to them is great.
